

for Industrial Yarns

Viscosity control

End group controlled

High viscosity

Medium/ high Viscosity

- Low GTA: yellowing & mechanical resistance
- Post condensation
- (Air bag & Tire cord application)

- Mechanical properties (monofilaments)

- Post condensation (Air bag & Tire cord application)

Resistance to environment effects

Thermo resistance

- Vulcanization
- High temperature resistance during spinning
- AB & TC application

Miscellaneous

P&H free

Post condensable

Tenacity

- Halogen & phosphorous free

- High resistance to an AB detonation
